

# QUIKFLO ADVANCED INTERIOR DRAINAGE SYSTEM

## THE EFFECTIVE AND RELIABLE WAY TO SOLVE WET BASEMENT PROBLEMS - PERMANENTLY!

QuikFlo is an advanced French drain system engineered specifically to solve basement water problems effectively without worry of clogging from soils under the floor.

The QuikFlo system is installed next to the footer, in accordance with the International Residential Code (IRC), specifically IRC Section R405, which governs proper foundation drainage. It intercepts water at the perimeter of your basement and drains it unseen safely away into our sump pump system.

QuikFlo, along with other **All Pro Basement products**, will keep your basement clean and dry so you can use the space for storage, recreational purposes, or to finish for additional living space.

**BEST OF ALL**, the QuikFlo system comes with a lifetime warranty for your peace of mind.
